

Industry 4.0

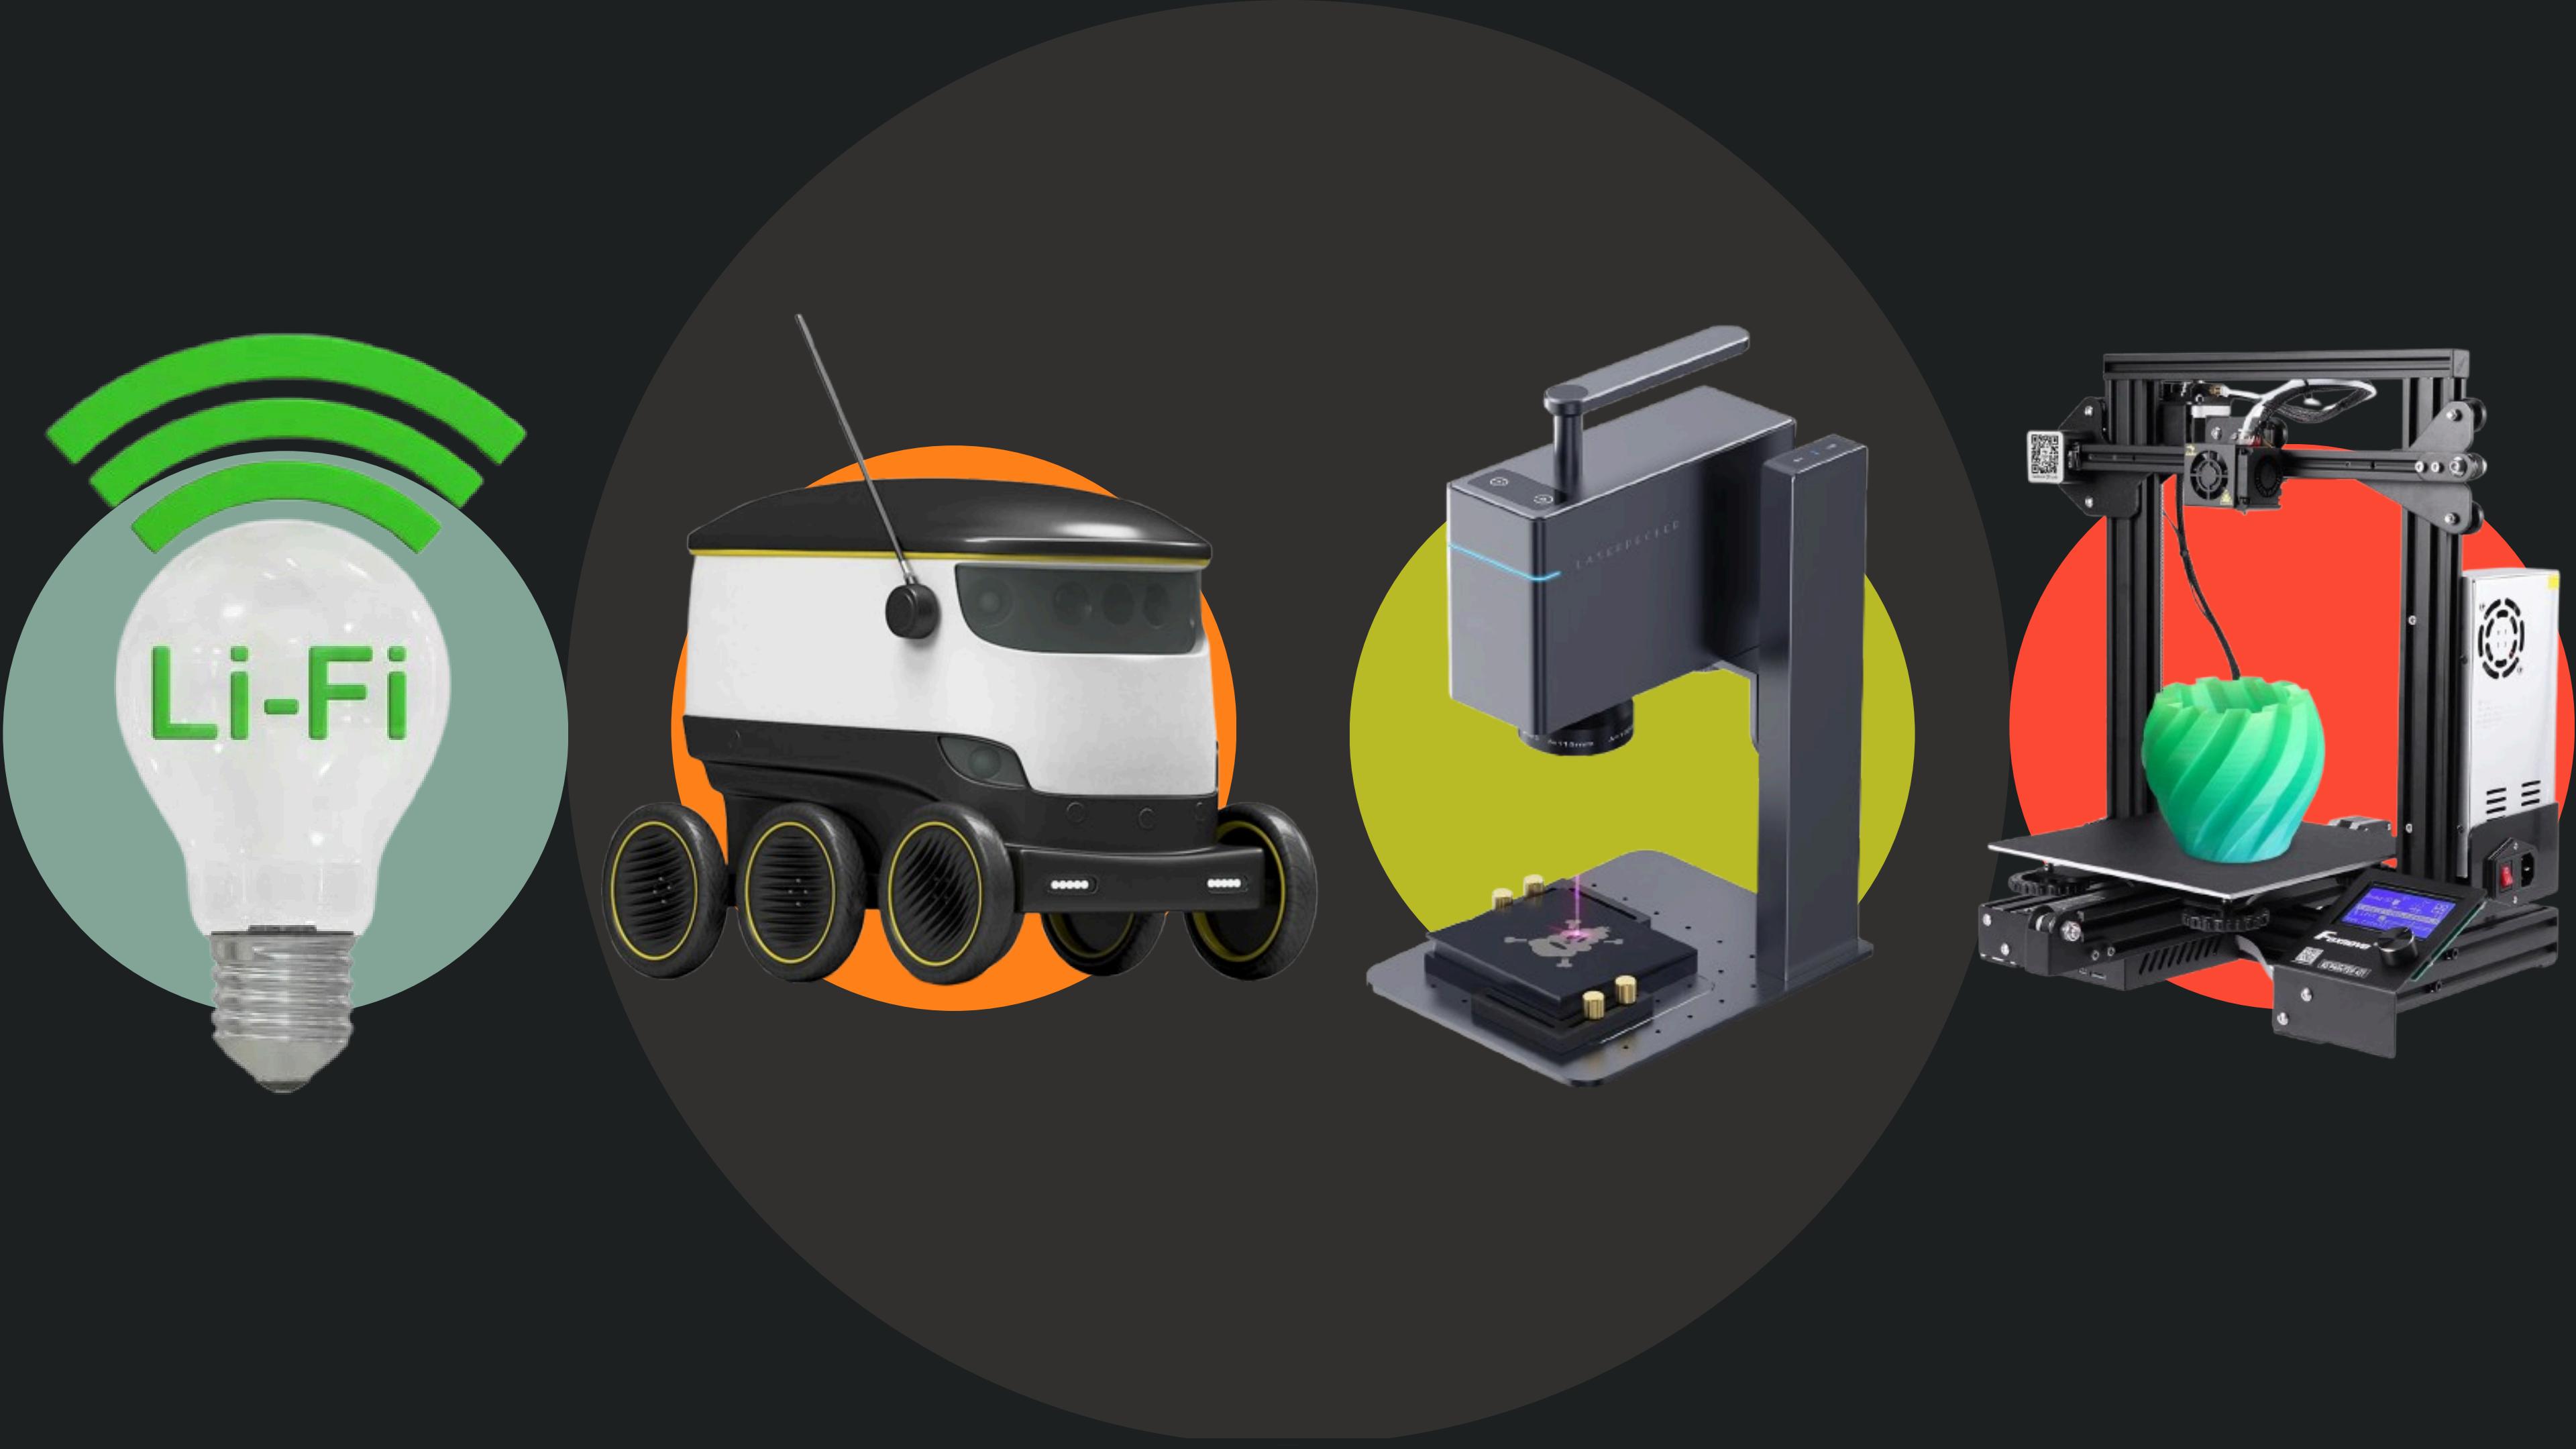

The Fourth Industrial Revolution

Velocity

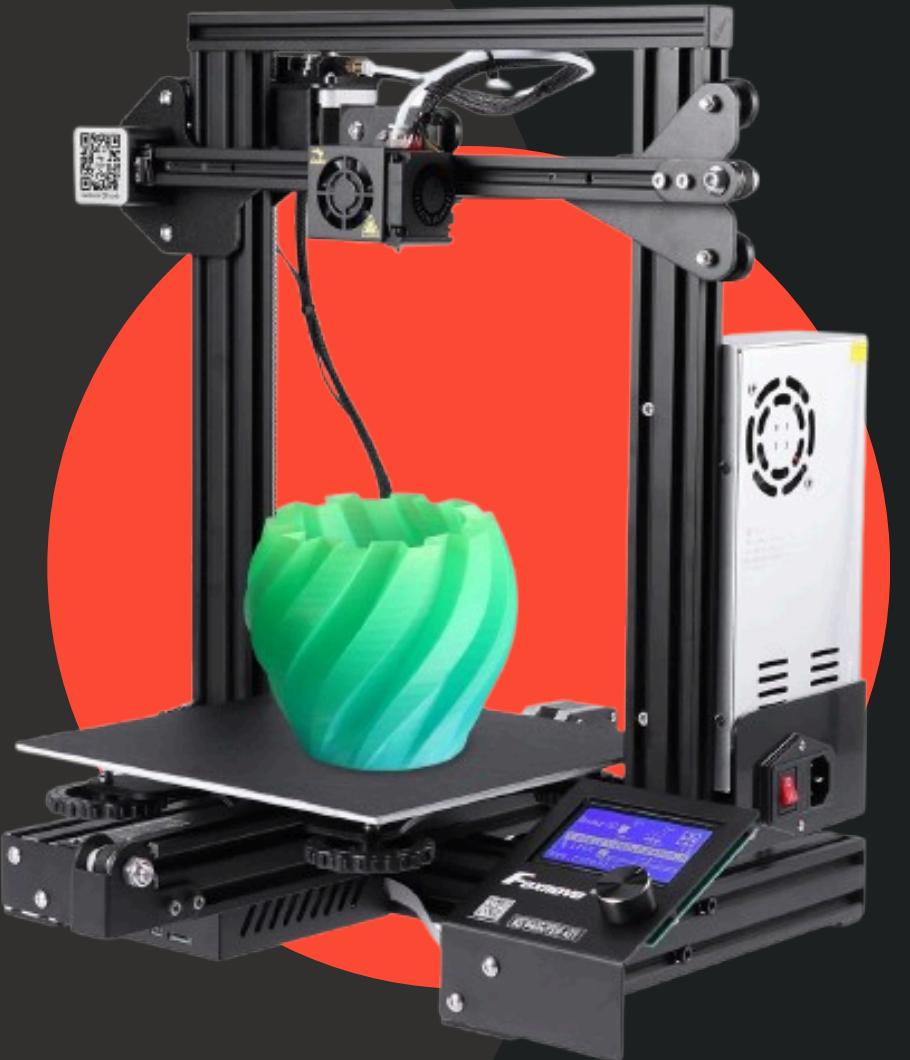

Scope

Synergy

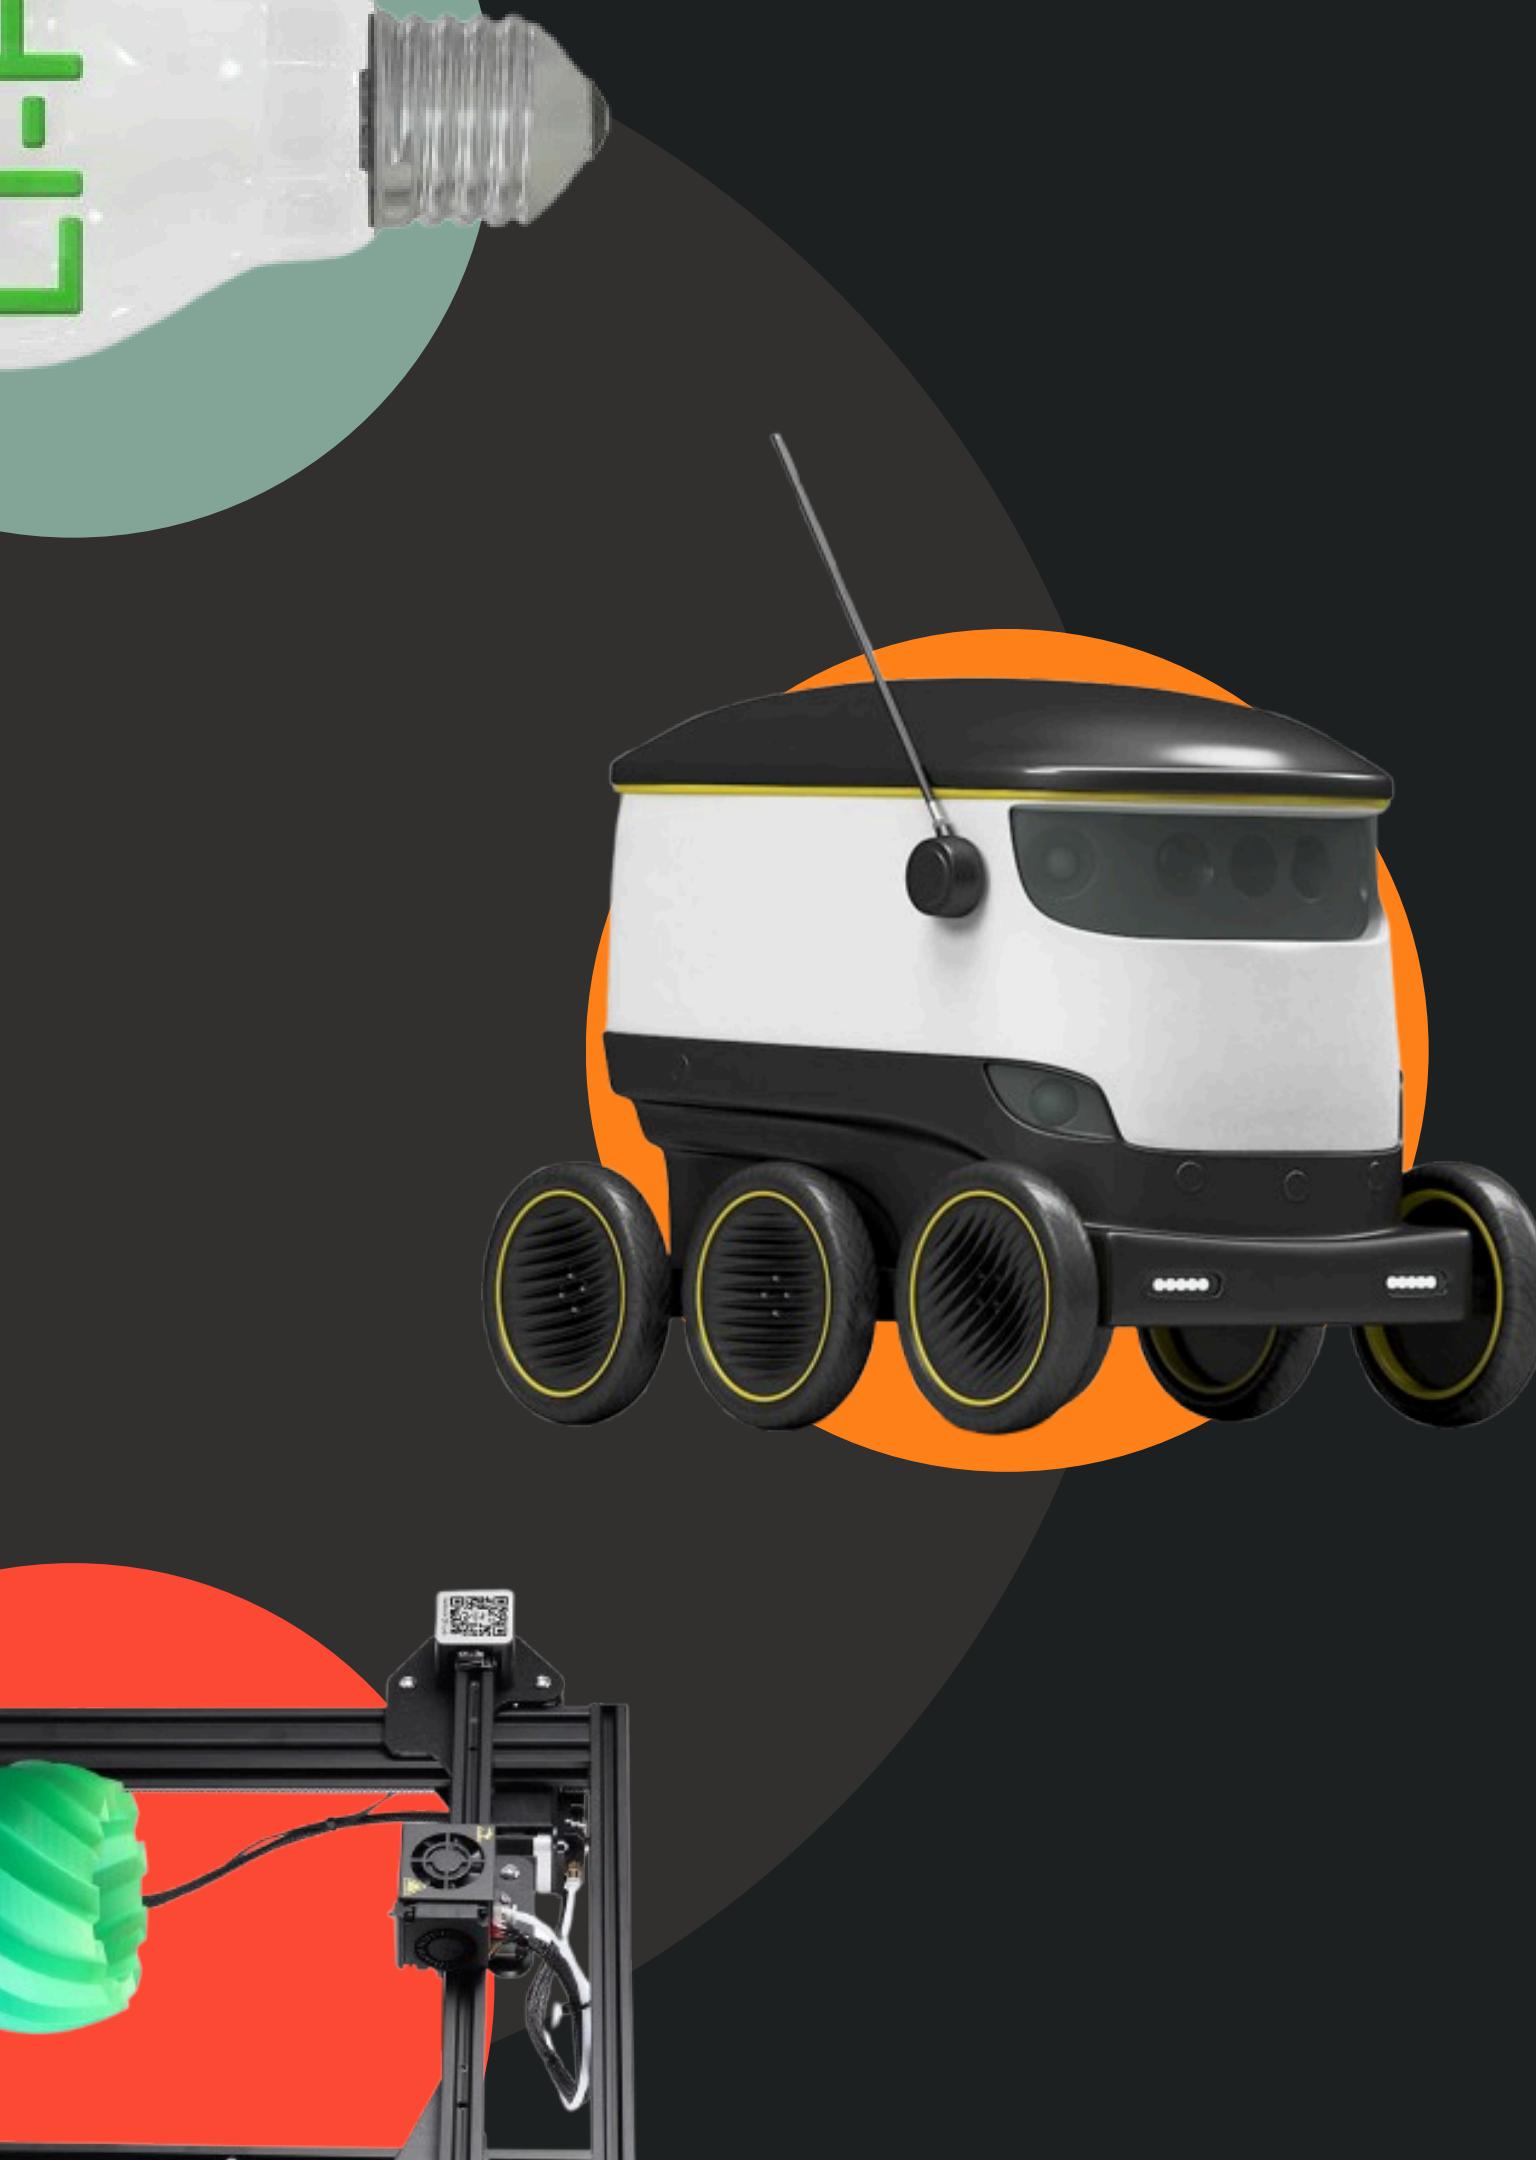

3D Printing

3D printing, involves creating objects layer by layer based on digital 3D designs.

Drone Delivery

Autonomous delivery robots, are capable of navigating urban environments to deliver goods.

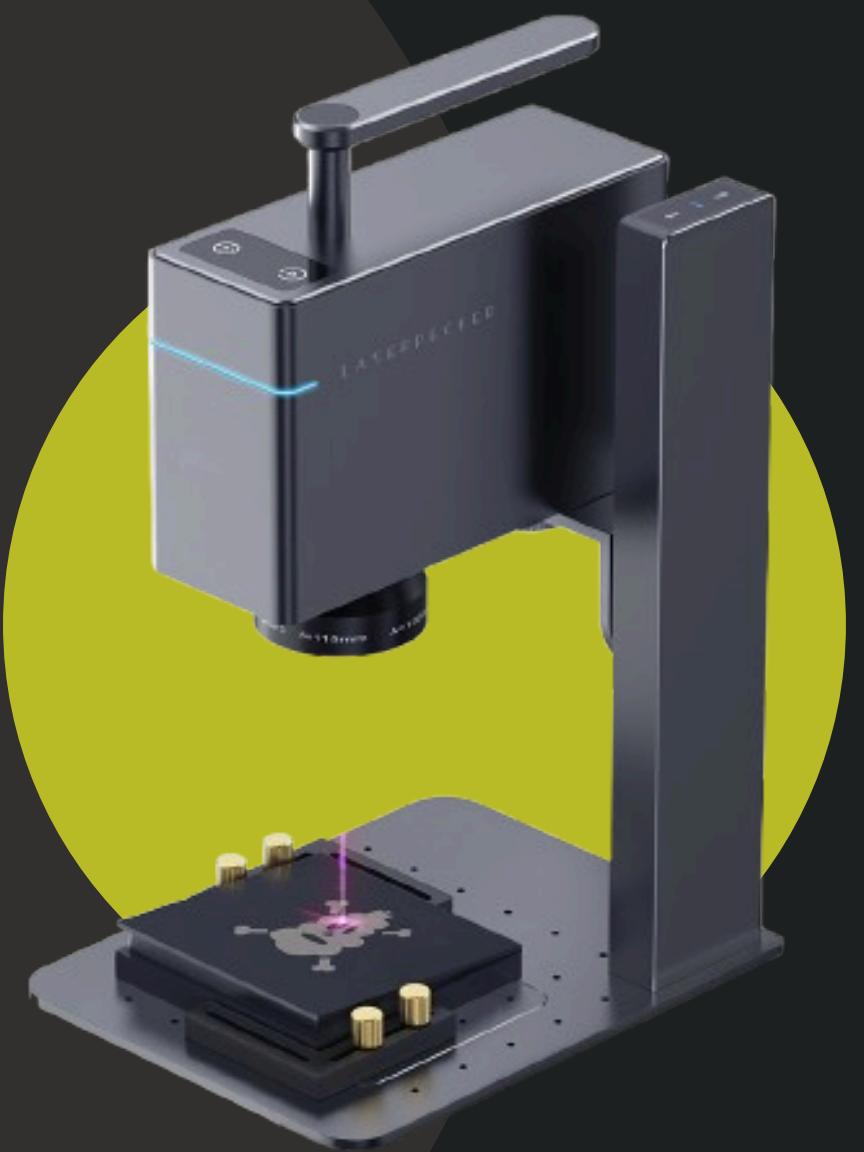

Li-Fi

Li-Fi uses visible light
instead of radio waves to
transmit data.

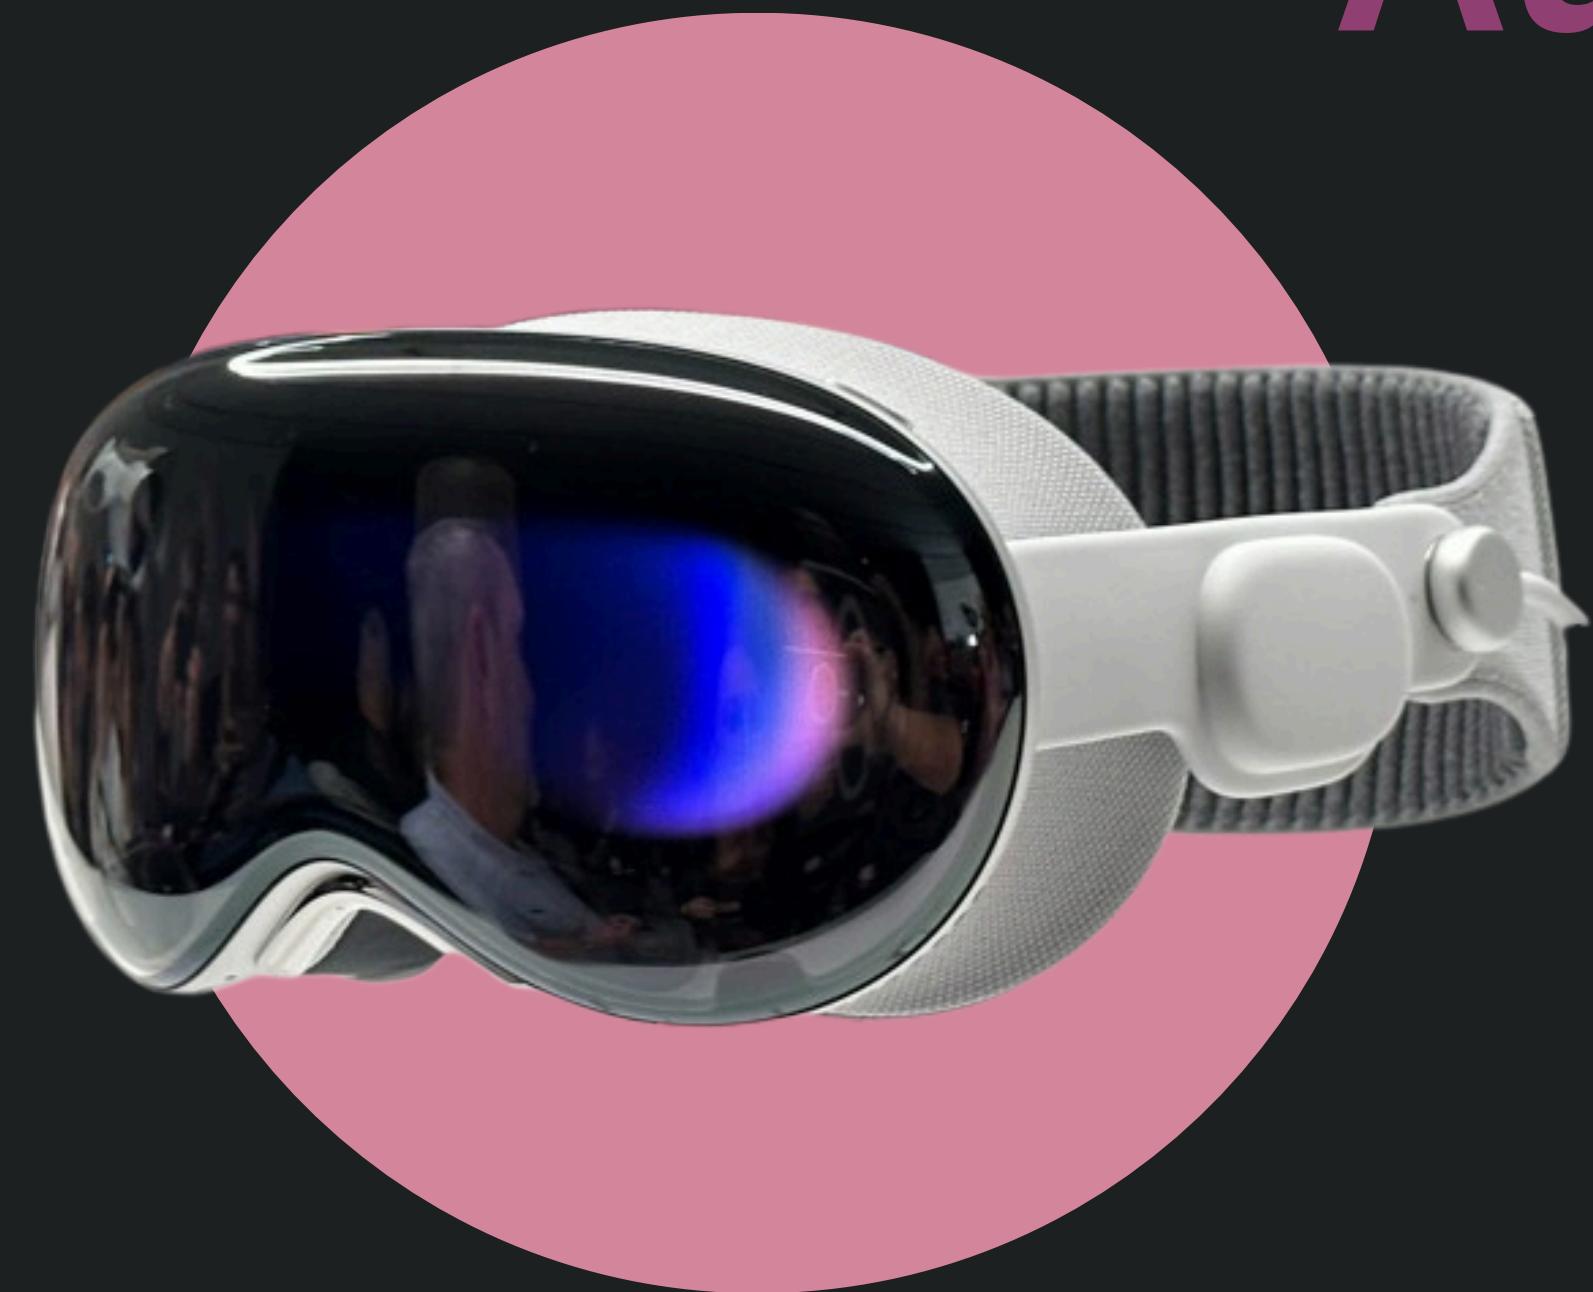

Laser

Lasers are highly focused beams of light with specific properties such as monochromaticity, coherence, and directionality.

Augmented Reality

Augmented reality
(AR) overlays digital
information onto the
physical world,
enhancing our
perception of reality.

The END

Thank you for listening
